## [Key Information](#)

iOS developer with 3+ years of commercial development experience and over 15 years of experience in related fields. He has implemented projects in the field of corporate messengers and his own applications in the App Store. I confidently work with UIKit, VIPER (to a lesser extent SwiftUI+MVVM), Core Data, Realm, REST API, and push notification integration. Experience working in product teams, Agile/Scrum.

## [Work experience](#)

### 1# 1C-Connect — iOS developer

August 2022 – August 2025

- Development and support of a commercial project ([App Store](#)). The application is a corporate messenger for business like Telegram or WhatsApp (chats, calls, support).
- Project stack - UIKit, VIPER, UI layout with code + xib, URLSession, WebSocket, UserDefaults, Realm, GCD, several targets for different companies, including notification extension, share extension, intents extension, SPM - Kingfisher, Firebase, WebRTC, PromiseKit, etc.
- Work in the Kunbun product team (release builds as soon as the release is ready), feature development, bug fixes.
- Tools: Git (GitLab, git flow), Jira, Confluence.
- Working with SwiftUI and MVVM - there are personal projects in the AppStore, as well as examples of applications with code on a personal website.

#### Progress:

- Developed the application's ticket system from 0. It consists of 5 modules of more than 30 thousand lines of code, UI from the code, data storage, API work, dynamic data changes via xmpp.
- Participated in releases used by thousands of corporate and private clients.

### 2# Independent iOS Development — iOS Developer

February 2022 – August 2022

- Development and support of native apps in the App Store.
- Main project: Ladder! ([App Store](#)).
- Stack: UIKit, VIPER, Core Data, URLSession, Firebase messaging.
- Independent work on design (Figma) and publication.

### 3# Andersen — iOS Developer (internship)

September 2021 – February 2022

- Development of a training project for booking meeting rooms.
- Stack: VIPER, Moya, UserDefaults, XCTest, Git (code review), Scrum.
- Practical experience working in an Agile team and passing technical interviews.

### 4# Sberbank — Credit Inspector in Bank

September 2005 – June 2021

- Lending to corporate clients.

## Education

- Otus - iOS Developer. Professional (educational program of additional professional education - 2025).
- Volgograd State Technical University — Computer Science and Computer Engineering (incomplete second higher education - 2020).
- Moscow University of Consumer Cooperation — Economics and Management (2005).

## Courses and certification

- iOS Developer Professional — Otus, 2025.
- Swift Starter — ITVDN, 2021.
- Fundamentals of Java Development — Sberbank Corporate University, 2020.
- Fundamentals of Software Testing — Sberbank Corporate University, 2019.

## Skills

- Languages: Swift, Java (basic).
- Frameworks and technologies: UIKit, VIPER, SwiftUI+MVVM, Core Data, Realm, SPM, CocoaPods, REST API, JSON, URLSession, GCD, async/await, Xib, AutoLayout, Push - notifications (Firebase).
- Tools: Xcode, Git/GitLab, Jira, Confluence, Figma.
- Methodologies: Agile (Scrum, Kanban).
- Languages: Russian — native, English — B1 (Intermediate).

## Additionally

- Published apps in the App Store (commercial and personal).
- Personal website: [denvich.com](https://denvich.com) (self-development in HTML, CSS, JS, Bootstrap, Gulp).
- I am also ready to develop in web development and testing in other areas.
